The figure is a line graph with a horizontal x-axis and a vertical y-axis. It features a single continuous black line. The line starts at a high point, descends to a local minimum, then rises to a sharp, high peak. After this peak, the line descends again, reaching a second, lower local minimum. From this minimum, the line rises to a third peak, which is slightly lower than the first. The line then continues with a series of smaller, irregular fluctuations. A thin horizontal line is drawn across the graph, and a short, thin line segment points from the peak of the main signal down to this horizontal line, indicating the peak's value relative to the baseline.

## Examination

DATE CONSIDERED

Christian W. Tsien

8/18/05.

**EXAMINER:** Initial if citation considered, whether or not citation is in conformance with MPEP § 609; Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to the applicant.
